Spare Parts Sales Engineer (m/f/d)

Permanent, full-time position to start as soon as possible in Santiago, Chile providing support for our business units in Chile and Perú.

Your tasks:

- Manage a client's portfolio and respond to spare parts purchase requirements
- Search for technical information on spare parts of different projects and participate in the sourcing process from national or foreign suppliers
- Prepare the offer to the client according to company policies and maximizing the economical position of the company
- Follow-up on generated offers to clients
- Support technical services and projects teams in the offering of spare parts, providing catalogue and quotations when required
- Keep record for historical data including past and current sales, installed equipment base and client's accounts to be contacted

We offer you:

- Multicultural environment
- Hybrid working model
- Permanent employment contract
- Individual professional development opportunities
- Annual feedback discussions
- Incentive plan according to individual performance
- Complementary health care insurance

Your profile:

- A university or technical degree in the field of industrial engineering, mechanical engineering, business management or comparable
- 2 to 5 years of relevant professional experience
- Skilled communicator, client oriented mind-set and commercial abilities
- Independent, organized and diligent work approach
- Willingness to travel local and regionally (occasionally, as required)
- Very good knowledge of English (Fluent speaker and writer)
- Desirable: Basic knowledge of industrial instrumentation, ability to understand mechanical and electrical drawings

As a **spare parts engineer** (m/f/d) you can expect varied tasks within a technical and international environment. You will be able to work independently but supported by a dynamic and highly motivated team.
